

To those who live in 3,4 Hyakunin-cho, 2,3 Okubo, 1-4 Takadanobaba and 4 Kita-Shinjuku:

Please take out glass bottles, cans, PET bottles spray cans, cassette gas cylinders and dry-cell batteries to **the garbage collection point** from Oct.6(Mon.) 2014.

(All the collection in the city by containers/nets will end in April 2015.)

★Please place bottles, cans, PET bottles, spray cans /cassette gas cylinders/dry-cell batteries in separate plastic bags that reveal its contents.

★Collection by the containers/nets at the street corner will end in October 2014. Collection methods at apartment buildings and condominiums will not be changed, but collection days may be changed.

To the collection container at the street corner

To the collection point

Q&A

Q1 Why will these items be collected at the collection point instead of at the container?

There are about 19,600 collection points in the city, whereas only about 3,600 collection containers. This causes various problems and inconvenience. The collection method will be changed for solving the problems, residents' convenience and promoting the recycling of waste.

Q2 I'm afraid the waste volume of each collection point will increase.

It is true that the items collected at each collection point will increase, but the amount of waste is expected to be about one fifth of that at each collection container.

Q3 I'm afraid using plastic bags instead of containers will be against reducing waste.

Those plastic bags will be recycled. There is a way to rent containers and nets (rental system) when they can be supervised at apartment buildings and condominiums. For more information, please contact the Waste Collection Office.
