

Small waste household electrical and electronic equipment are collected.

Items used for business purposes cannot be collected.

Nine products subject to collection

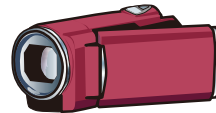

Mobile phones

Digital cameras

Portable video cameras

Mobile music players

Mobile game devices

Portable car navigation systems

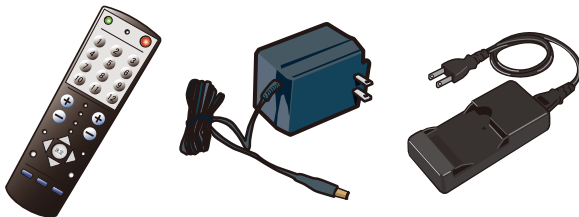

Electronic dictionaries

Calculators

Accessories (such as remote controls, cables and AC adapters)

⚠ Please note:

- Please disengage removable power packs and batteries.
- Please erase all personal information recorded in the devices with your responsibility.
- Please remove or delete personal information from device memory.
- Collected small electric devices cannot be returned.

Electrical and electronic equipment other than the nine products indicated are either categorized as "Metal / Ceramic / Glass waste" or as "Bulky waste (objects exceeding roughly 30 centimeters in either of the dimensions)".

● Location of dedicated collection boxes

Please inquire with **the Shinjuku waste collection office - business section (03-3950-2962)** concerning the collection of small waste electrical and electronic equipment.

Why is it important to recycle small electrical and electronic equipment?

Mobile phones, digital cameras and other small electrical and electronic equipment contain precious metals (gold / silver / copper) and rare metals such as palladium in addition to normal metals like steel and aluminum. Small electrical and electronic equipment also contain lead and other hazardous substances, and need to be processed adequately. However, most of such substances were disposed by reclamation with the exception of steel and some other metals until recently. Additionally, the equipment are disposed inadequately by illegal waste collection businesses both domestically and internationally.

The collected small electrical and electronic equipment are recycled as illustrated.

Small electrical and electronic equipment collected at counters and through dedicated collection boxes are released to "accredited businesses" certified by national regulations to be disassembled / crushed accordingly. The metals and plastic material are then sorted and the metal components are entirely recycled by metal refiners. Hazardous substances are also disposed adequately in this process. The collected small electrical and electronic equipment are eventually recycled as material for manufacturing new products.

● Results of box collection, over-the-counter collection, and at-event-sites collection for FY 2017

Small waste electrical and electronic equipment (9 products):
13,260.8 kilograms (mobile phones 7,832.7kg)

● Recycled resources

	Iron (Kg)	Aluminum (Kg)	Copper (Kg)	Gold (grams)	Silver (grams)	Palladium (grams)	Stainless steel (grams)
9 products	1,381.2	205.6	1,024.1	2,724.92	8,963.36	36.33	63.8
(mobile phones)	(0.0)	(0.0)	(750.4)	(2,611.38)	(8,028.61)	(0.0)	(0.0)

Please inquire with [the Shinjuku waste collection office - business section](#) (03-3950-2962) concerning the collection of small waste electrical and electronic equipment.
