

Plastic is a resource

From April 2024 onward, **product plastics**, which were previously collected as burnable waste, **will be collected** and recycled alongside **packaging plastics** as **resource plastics**.

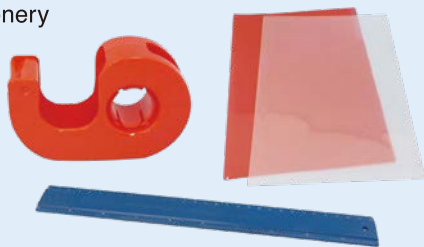

Items that can be collected as recyclable plastic

Product plastic

Made of 100% plastic and generally with dimensions not exceeding 30 cm square.

Stationery

Daily necessities

Toys

Kitchenware

Packaging plastic

Plastic containers and packaging marked with the symbol for plastic, which are no longer needed after the contents have been used.

Bottles, tubes

Trays, packs

Containers, cups

Styrofoam, cushioning material

Plastic bags, film

Caps and nozzles

How to dispose of plastic resources

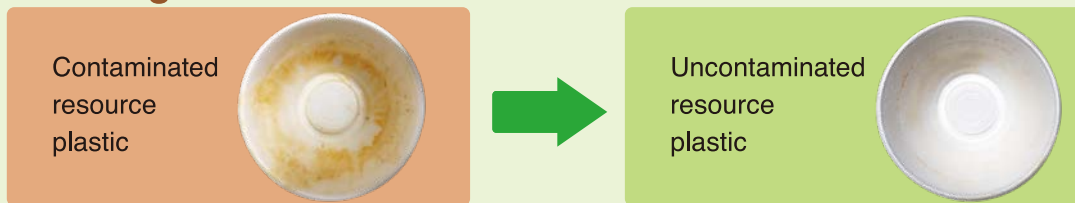

Please put “product plastic” and “packaging plastic” in a single bag and take it to the resource/garbage collection point on your designated day once a week.

If it's dirty...

Rinse it lightly with water until no further soiling can be seen. If it remains soiled, please dispose of it as “burnable garbage”.

Note: For items exceeding 30 cm in any dimension, please apply for disposal as oversized waste.

Items that cannot be collected as resources

Items powered by electricity or batteries
(Small home appliances, electronic devices, etc.)

Medical equipment used in home healthcare
(Needles, syringes, tubes, bags, etc.)

Items containing materials other than plastic, such as metal

Items containing built-in small rechargeable batteries
(such as chargers, mobile batteries, and electronic cigarettes)

Caution: Lithium-ion batteries and other small rechargeable batteries can cause fires.

Please take small rechargeable batteries and power banks to JBRC cooperative stores (such as electronics retailers).

For products with non-removable small rechargeable batteries, please dispose of them as metal, ceramic, or glass waste.
